What is this product?

Type: Shares of a Sub-Fund of Amundi Funds, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: Seeks to increase the value of your investment and to provide income over the recommended holding period through investment in Sustainable Investments pursuant to Article 9 of the Disclosure Regulation.

Investments: The Sub-Fund invests at least 80% of net assets in a diversified portfolio of investment grade "Green Bonds", with at least 67% of its net assets in investment grade "Green Bonds" issued by companies around the world, denominated in EUR or other OECD currencies. The Sub-Fund invests at least 51% of net assets in bonds that are denominated in EUR. "Green Bonds" are defined as debt securities and instruments which fund eligible projects meeting the criteria and guidelines of the Green Bond Principles (as published by the ICMA). The Sub-Fund may invest up to 30% of net assets in emerging markets bonds. The Sub-Fund's average interest rate duration ranges between +/- 1 year versus the Benchmark. Non-EUR investments are aimed to be hedged against the EUR. The Sub-Fund's exposure to contingent convertible bonds is limited to 10% of net assets. The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit). The Sub-Fund may use credit derivatives (up to 40% of net assets).

Benchmark: The Sub-Fund is actively managed by reference to and seeks to outperform the Bloomberg Euro Aggregate Corporate 1-3 Year Index. The Sub-Fund is mainly exposed to the issuers of the Benchmark, however, the management of the Sub-Fund is discretionary, and will be exposed to issuers not included in the Benchmark. The Sub-Fund monitors risk exposure in relation to the Benchmark however the extent of deviation from the Benchmark is expected to be limited.

Management process: The investment process identifies the best opportunities both in terms of financial prospects as well as their ESG, in particular environmental, characteristics. The selection of securities through the use of Amundi's ESG rating methodology and the evaluation of their contribution to environmental objectives aims to avoid adverse impacts of investment decisions on Sustainability Factors associated with the environmental nature of the Sub-Fund. In addition to using the Amundi ESG rating, the ESG investment research team assesses, to the extent available: (i) Any third party opinion or other certification, such as Climate Bond (CBI) certificates; (ii) Whether the issuer faces severe ESG controversies; and (iii) Whether the projects to be financed by the green bond contribute to wider efforts by the issuer to favour the energy and/or environmental transition. The sub-fund does not invest in companies deemed not compatible with the objective of the Paris Climate Agreement to limit global warming; the sub-fund therefore excludes companies that derive more than a certain percentage of their revenue from fossil fuels. Further, the Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the Benchmark.
