What is this product?

Type: Shares of a Sub-Fund of CPR Invest, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The Compartment's objective is to outperform the MSCI World Net Return Index (denominated in the currency of each relevant Share Class) over a long term period (minimum of five years) by investing in international equities capturing the long-term consumer trends driven by demographic shifts, societal changes and digitisation of the economy, while also integrating Environmental, Social and Governance (E, S, and G) into the investment process.

The Compartment's sustainable investment is focused on tackling climate change and aims to obtain a lower carbon intensity than its investment universe by selecting investments as described below. The Compartment integrates Sustainability Factors in its investment process as outlined in more detail in section 4.9 "Overview of the Responsible Investment Policy" of the Prospectus.

The investment strategy selects companies benefiting from long term consumer trends organised around four dimensions: digital consumption, daily life consumption, entertainment and premium consumption.

The Compartment invests mainly in equities of companies located all around the world.

The sustainable construction of the investment universe is further improved by excluding companies based on the Management Company's ESG approach (using environmental, social and governance criteria) :

- Exclusion of the worst overall ESG scores (i.e., F and G)

At least 90% of portfolio stocks have an ESG score. The Management Company undertakes to ensure that the Compartment's ESG score is higher than the investment universe's ESG score after excluding at least 20% of stocks with the worst scores according to the ESG approach. In determining the ESG score of the Compartment and the Benchmark, ESG performance is assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three ESG characteristics of environmental, social and governance. The selection of securities through the use of Amundi's ESG rating methodology takes into account principal adverse impacts of investment decisions on Sustainability Factors according to the nature of the Compartment.

The best-in-class approach does not exclude any sector of activity in principle. All economic sectors are therefore represented in this approach and the Compartment may therefore be exposed to some controversial sectors.

The Compartment equity exposure will be between 75% and 120% of its assets.

The Compartment is invested for at least 75% of its assets in equity and equity equivalent securities of any country without constraints of capitalisation. Among this proportion of 75% of its assets, the Compartment may invest in China A shares via Stock Connect within a maximum of 25% of its assets.

Derivatives instruments may be used by the Compartment for hedging, arbitrage, exposure purposes and/or efficient portfolio management.

The Compartment is actively managed and seeks to outperform the Benchmark. The Compartment is mostly exposed to the issuers of the Benchmark, however, the management of the Compartment is discretionary, and will be exposed to issuers not included in the Benchmark. The Compartment monitors risk exposure in relation to the Benchmark however the extent of deviation from the Benchmark is expected to be significant.

The Compartment is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment over the recommended holding period with the ability to bear losses up to the amount invested.

Redemption and Dealing: Shares may be sold (redeemed) as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the CPR Invest prospectus.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the CPR Invest prospectus.

What happens if CPR Asset Management is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of CPR Invest. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.
