INVESTMENT OBJECTIVE

The All Weather Sustainability Strategy is a multi-asset class, strategic, long-only portfolio that is designed to achieve both financial and sustainability goals, using assets that are aligned with the United Nations Sustainable Development Goals (SDGs). Bridgewater believes the best way to achieve both financial and sustainability impact goals is through portfolio engineering that incorporates these objectives holistically, beginning with 1) clearly defining what these goals are, 2) systematically looking across a variety of asset classes to find assets that are aligned with these goals, and then 3) combining these assets into a portfolio using Bridgewater's All Weather approach, which prioritizes balance across different economic environments, to efficiently collect market risk premiums and deliver a high gross Sharpe ratio. The Strategy utilizes liquid, publicly traded markets across asset classes (equities, nominal and inflation-linked bonds, and commodities) to implement Bridgewater's systematic processes for assessing sustainability and achieving environmental balance.
