BOND ■

Objective and Investment Policy

The Sub-Fund seeks to increase the value of investment and to provide income over the recommended holding period.

The Sub-Fund seeks to achieve its investment objective by investing mainly in Euro denominated Investment Grade corporate and government bonds (fixed or floating rate), that are listed or traded on a Permitted Market. The Sub-Fund may invest up to 10% of its assets in Euro denominated Investment Grade Emerging Markets corporate bonds. The maturity of the above listed instruments will be not longer than 10 years. The Fund may also hold cash and instruments that may be readily converted to cash (including cash deposits, European treasury bills and government bonds, short-term corporate bonds, commercial paper, short term Money Market Instruments and certificates of deposit). The Sub-Fund will not use derivatives.

Benchmark : The Sub-Fund is actively managed and is not managed in reference to a benchmark.

Management Process : The Investment Manager determines the investable universe for the Sub-Fund using an investment process which is based on a combination of a bottom up analysis of an issuer and its industry's fundamentals and a top-down analysis of macroeconomic developments to manage the overall portfolio risk. This is a non-distributing share class. Investment income is re-invested. The minimum recommended holding period is 3 years. Investors may sell on demand on any business day in Ireland.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi Funds Solutions ICAV prospectus.
