Objective and Investment Policy

The aim of the Fund is to achieve long-term capital growth by investing in the shares of companies which offer a high dividend pay-out.

The Fund will invest primarily in shares of North American (U.S. and Canada) companies listed or trading on recognised exchanges worldwide.

The Fund is considered to be actively managed in reference to the MSCI North America Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is "a medium-high" risk class. This rates the potential losses from future performance at a medium-high level, however poor market conditions will likely impact the ability to provide a positive return on your investment. The Risk Factors applicable to the Fund are liquidity risk, counterparty risk, currency risk, operational risk and interest rate risk.
