Index description	The Previous Index is an equity index based on the MSCI All Countries World Index (ACWI) representative of the large and mid-cap equities across 23 developed market countries and 27 emerging markets (EM) countries (as of December 2021) (the "Parent Index"). The Previous Index provides exposure to companies with outstanding Environmental,	The New Index is an equity index based on the MSCI ACWI Index representative of the large and mid-cap stocks across developed and emerging market countries (the "Parent Index"), that excludes companies from the Parent Index based on environmental, social or governance (ESG) criteria (e.g. exclusion based on business

	Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Previous Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to fulfil the requirements of an EU Paris-aligned Benchmark ("EU PAB") in accordance with the Benchmark Regulation. The Previous Index is a net total return index, meaning that dividends net of tax paid by the Previous Index constituents are included in the Previous Index return.	activities, including controversial weapons). Additionally, the New Index targets a minimum 30% reduction in Greenhouse Gas ("GHG") emission intensity relative to its Parent Index. The New Index is a net total return index, meaning that dividends net of tax paid by the New Index constituents are included in the New Index return.
