**Benchmark :** The Sub-Fund is actively managed by reference to and seeks to outperform the composite index 70% MSCI World All Country Index USD Index; 30% JPM Global Aggregate USD unhedged Index (the "Benchmark"). The Sub-Fund is mainly exposed to the issuers of the Benchmark, however, the management of the Sub-Fund is discretionary, and will be exposed to issuers not included in the Benchmark. The Sub-Fund monitors risk exposure in relation to the Benchmark however the extent of deviation from the Benchmark is expected to be significant.

**Management Process :** The Sub-Fund integrates Sustainability Factors in its investment process as outlined in section "Overview of Responsible Investment Policy" in the Prospectus. The management process involves an investment allocation by the Investment Manager across four principal pillars of investment strategy based on the objective and policies of the Sub-Fund in order to select the Sub-Fund's investments. These comprise alpha (active return) generating macro, satellite, and selection strategies and a macro hedging strategy. The strategies involve a combination of a bottom up analysis of fundamentals, top-down analysis of macroeconomic developments as well as the selection of less correlated investments and the use of macro hedging to preserve return or mitigate risk. This is a non-distributing share class. Investment income is re-invested.

The minimum recommended holding period is 3 years.

Investors may sell on demand on any business day in Ireland.

### Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the risk of the equity market, international bonds and money market instruments in which it is invested.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the share class.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Hedging risk : The currency hedging may be imperfect and generate a difference between the performance of the Sub-Fund and the share class you are invested in.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The use of complex products such as financial derivative instruments might increase market movements in your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
